Ecommerce Website
Tech Stack- HTML, CSS, JavaScript, Node JS and MongoDB

- Developed a fully functional e-commerce website using HTML, CSS, JavaScript, Node Js, and Mongo DB, integrating user authentication, product management, and payment processing features.
- Implemented responsive design to ensure cross-device compatibility and optimal user experience, bootstrap CSS frameworks and custom media queries. Also, optimized website performance and security by incorporating best practices in code efficiency, database management, and server-side validation.

Software Company Website — Link: Company Project *Tech Stack – Mern Stack 08/2024 - 02/2025*
The website is an India-based software development company providing end-to-end solutions including software development, web & mobile apps, hosting, and digital marketing services. The company focuses on building scalable business applications and interactive websites to improve operational efficiency, brand visibility, and customer reach.

Full Stack- E- State —Link: GitHub Personal Project *Tech Stack – Mern Stack 02/2025 - 12/2025*

- Modern Properties: - A **real estate website** is an online platform designed to showcase, promote, and manage property listings for sale, rent, or lease. These websites act as digital marketplaces where buyers, sellers, landlords, and tenants can connect.
